# Software update with FlashManager Plus

# 1 Introduction

These mounting instructions put you in the position to successfully update the **Automatic lamb feeder ECO** as intended.

- > Please read these mounting instructions carefully before updating.
- > Keep these mounting instructions readily available at all times.
- > Observe all of the warnings and safety instructions in these mounting instructions at all times.

# 2 For your safety

### 2.1 Target group

#### 2.1.1 Necessary qualifications of the service technician

Solely trained service technicians are authorised to update the program.

Service technicians are electricians with appropriate qualifications, i.e. they are able to assess the work assigned to them and detect potential risks on the basis of their technical training as well as their knowledge of the relevant standards. This also includes the knowledge of relevant accident prevention regulations, generally accepted safety regulations, EU guidelines and country-specific standards and provisions.

### 2.2 Indication of hazards

Dangers are indicated by a key word and a corresponding sign, depending on the severity and probability:

	- ·
Λ	Danger!
	For an imminent danger, resulting in serious injuries or
$\overline{}$	deeth
Λ	Warning!
	For a potentially dangerous situation which may cause se-
	rious injuries or even death.
Λ	Caution!
	For a potentially dangerous situation which may cause mi-
	nor injuries or material damage.
Attention	For a potentially harmful situation in which the product or an
	item can become damaged within its environment.

**Note** For application notes and other useful information.

However, it is just as important to observe any other notes and information which are not highlighted to avoid failures which, in turn, may cause direct or indirect injuries or material damage.

# 3 Carrying out the update

To carry out the software update you have to observe the mounting instructions of the **FlashManager Plus**. An update is only possible when the FlashManager Plus is installed on the PC.

Proceed as follows:

### Warning!

Live electrical components.

Danger of death by electric shock!

- Always pull the mains plug of the automatic feeder before connecting the connectors or/and interface boards of the update set to the connections of the board.
- 1. Write down the settings of the feed temperature, the portion size and the powder concentration.
- 2. Switch the automatic feeder off and unplug the power plug.
- 3. Unscrew the four screws at the keypad.

1. Screws (4x)

4. Hang the keypad in the bracket provided.
